

Robotiq85 | Proposed six actor points

Front projection along adapter X | Root and base anchors stay fixed in the adapter frame

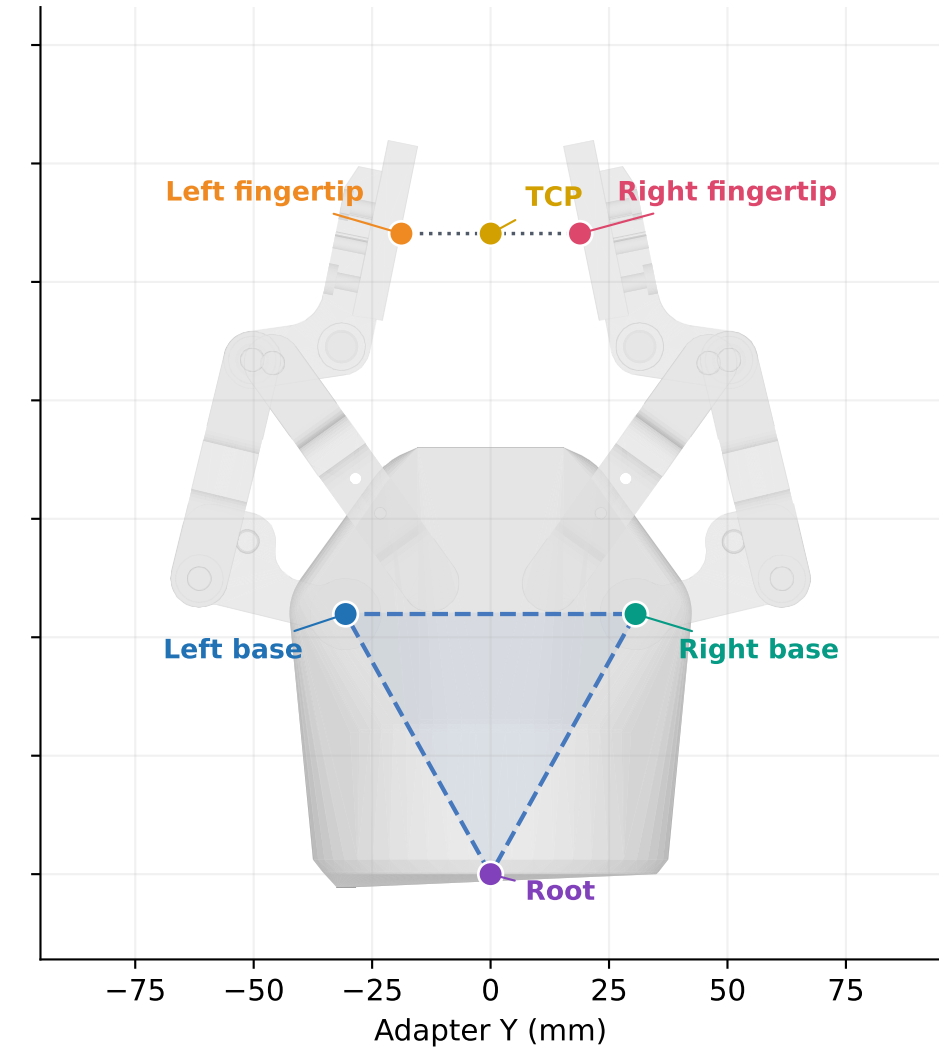

Actuator target: 0.0 rad
Measured pad gap: 102.9 mm

Actuator target: 0.4 rad
Measured pad gap: 68.6 mm

Actuator target: 0.8 rad
Measured pad gap: 37.7 mm

Anchor drift across snapshots: 0.000e+00 mm | TCP = midpoint of the two fingertip contact centers
Original robosuite 1.4.1 geometry; existing base mesh replaces missing visual asset.
Independent 6-second simulation snapshots; maximum close command does not fully close this model. XML left/right names retained.
